This filing is made in response to questions raised in the May 15, 2013 Request for Additional Information issued to Environment New Mexico. You inquired as to why no 24-hour reports were filed for expenses on behalf of Barack Obama and Martin Heinrich, which were reported on Environment New Mexico's Year End report as incurred on October 28, 2012. The reason that no 24-hour reports were filed is that staff expenses listed were in fact for time spent by the listed employees in the pay period beginning on October 28, 2012. Some of the staff time included in that expense took place on and after November 5th, and the portions of the staff time that took place during the 24-hour report period did not meet the \$1,000 threshold, so no 24-hour report was triggered. We have submitted a revised Year End report to more clearly state when staff time expenses for that period were in fact incurred.
